

AI/ML Engineer with hands-on experience in developing and deploying machine learning models on real-world data. Proficient in Python, FastAPI, and modern ML frameworks with a strong foundation in data analytics, NLP, and computer vision. Experienced in building scalable APIs, performing data preprocessing, and optimizing model performance. Skilled in collaborating with cross-functional teams to deliver efficient, data-driven solutions.

Education

Ganpat University

Bachelor of Technology - Computer Engineering (Artificial Intelligence)

Ahmedabad, Gujarat

Jul 2024

Experience

Unified Mentor Pvt. Ltd.

Machine Learning Intern

Gurugram

Apr 2025 - Oct 2025

- Developed and deployed **machine learning models** on real-world datasets, performing **data preprocessing**, **feature engineering**, and **model evaluation** to improve accuracy and performance.
- Built end-to-end **ML pipelines** using **Python**, integrating frameworks such as **Scikit-learn** and **TensorFlow** for efficient model development and deployment.
- Implemented model validation and performance monitoring using **cross-validation** and **error analysis** to ensure reliable predictions.
- Collaborated with cross-functional teams and mentors to optimize models, enhance performance, and deliver scalable AI solutions.

Webelight Solutions

AI & Data Analytics Intern

Ahmedabad

Jan 2024 - Jun 2024

- Analyzed marketing data using **Python** and **Excel** to derive actionable insights and improve campaign performance.
- Evaluated key metrics such as CTR, conversion rate, and ROI to support data-driven decision-making.
- Performed **SEO** and website **traffic analysis** using tools like **Google Analytics**, including **keyword research** and on-page content optimization to improve search rankings.
- Worked with **technical** and **marketing teams** to convert business needs into **data-driven solutions**, ensuring efficient project delivery.

Achievements

- Appointed as **School People Leader(SPL)**, demonstrating leadership and team coordination.
- Acknowledged by **SSIP** and **Gujarat Knowledge Society** for leadership and coordination as a Hackathon Volunteer during the Regional Round of Azadi Ka Amrit Mahotsav **Hackathon 2022**.

Skills

- Python
- SQL
- C
- Java
- HTML5
- CSS3
- JavaScript
- FastAPI
- Django
- MySQL
- PostgreSQL
- Machine Learning
- Deep Learning
- NLP
- Computer Vision
- GitHub
- DSA
- OOP'S
- Operating Systems
- DBMS

Language

- Telugu
- Hindi
- English

Certifications

- [TCS iON Career Edge - Young Professional Certification](#)
- [Networking Essentials Certification](#)
- [Data Analytics Internship Certification](#)

Projects

Sign Language Alphabet Recognizer - [GitHub](#) [DEC 2023]

Tech Stack: (Python, OpenCV, TensorFlow, Machine Learning, Deep Learning)

- Developed a **deep learning-based system** to recognize hand sign alphabets in real time.
- Implemented **image preprocessing**, **feature extraction**, and **classification** to improve accuracy.
- Aimed at bridging **communication** gaps for individuals with hearing impairments.

Just Date - Global Dating Application - [GitHub](#) [JUNE 2024]

Tech Stack: (HTML, CSS, JavaScript, React.js, Bootstrap)

- Developed and enhanced responsive user interfaces for a global dating application.
- Implemented features such as profile liking, advanced interest-based matching, global search, visitor mode, and premium subscriptions.
- Built both **mobile user-facing** features and a **web-based** admin management system.

ChefMind: Local LLM-Powered Recipe Chatbot - [GitHub](#) [OCT 2025]

Tech Stack: (Python, Local LLM, FastAPI, Machine Learning, NLP)

- Fine-tuned a **local open-source LLM** on custom recipe datasets for ingredient-based recommendations.
- Built a **FastAPI-based REST API** to serve machine learning model predictions in structured **JSON** format.
- Developed a **chatbot** interface that suggests recipes based on user-entered ingredients.
